

When I am asked how to find a clinician that is interested in the evaluation and treatment of someone that might have "Lyme Disease", I suggest three sources.

1. The physician referral page at [lymediseaseassociation.org](http://lymediseaseassociation.org)
2. The physician referral page at [ilads.org](http://ilads.org)
3. The local email server/meetings for a Lyme Disease Support group... and, then ask the members who is treating people in their area
